Backup, retain and restore your M365

AUCloud M365 Backup-as-a-Service (M365 BaaS) is a cost-effective way to provide enhanced protection of Microsoft 365 data at the OFFICIAL and PROTECTED security levels.

Traditionally, Microsoft 365 data is covered by multiple, disparate retention policies governing the time data is retained, and if data goes through 'recycle' stages or is permanently deleted. This approach can result in confusion and loss of data.

AUCloud M365 BaaS provides a single set of rules to cover limitations within Microsoft 365, including backup for mailboxes, SharePoint and OneDrive data.

Backup made easy, while data is protected

M365 Backup

Manage Microsoft 365 backup, retention and restoration holistically using the feature-rich, user-friendly AUCloud portal.

Secure Monitoring

AUCloud is engineered to 'PROTECTED', IRAP certified and secured with industry-leading proactive cyber security monitoring.

Backup

Copies of your data stored in AUCloud's sovereign cloud. Schedule your backups as often as needed.

Retention

Set retention times for as long as required.
AUCloud's scalable object storage costs a low GB/month rate.

Restoration

AUCloud's service portal provides access to your data. Individual or bulk file retrieval with RTO as low as a few minutes.

Use Cases

- Protect against ransomware attacks
- Recover malware or virus infected data
- Restore deleted OneDrive data
- Retrieve accidentally deleted data
- Restore SharePoint data
- Meet data retention policy requirements

Simple, transparent pricing

AUCloud M365 BaaS is a complete security solution that complies with the requirements of the ASD ISM.

Pay only for what you use:

- **Licensing:** VM/month fee
- **Storage:** GB/month rate

Price includes:

- Data ingress and egress
- Internet connectivity on a shared connection
- Load balancing and firewalling (Edge Service Gateway).

AUCloud Microsoft 365 Backup-as-a-Service

Features

- Data copies stored in sovereign, IRAP certified cloud
- Easy to access and use portal with tools that enable individual file tracking
- RTO and RPO as low as a few minutes
- Integration with VMware vCloud Director
- Option to restore files in bulk or individually
- Full M365 data retention and protection

Benefits

- Schedule backups with an RPO of a few minutes
- Administrators can perform quick, self-service file retrievals
- Confidence that data retention policies are met
