

Enjoy cloud flexibility, security and control

AUCloud and VMware specialise in providing professionals with the latest cloud solutions from storage, backup to disaster recovery and monitoring. We specialise in a platform that supports the compatibility of existing virtualised platforms, through to the transition to cloud infrastructure, and continuity of data protection without the need to retool.

Trusted by Australia's leading organisations

ISO 27001 Certified

AUCloud's ISO 27001 certification covers end to end development, management, operation and security of AUCloud information systems and infrastructure, AUCloud automation and orchestration capabilities, and service delivery.

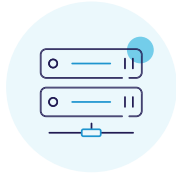

IRAP Certified

AUCloud is IRAP assessed to "Protected" using the Australian Cyber Security Centre (ACSC) Cloud Assessment and Authorisation Framework (CAAF) and meets or exceeds the Australian Signals Directorate (ASD) Information Security Manual (ISM) standards.

VMware Sovereign Cloud Provider

AUCloud is an official Sovereign Cloud Provider, meeting geographic specific sovereign cloud requirements, regulations and standards to ensure sovereign data protection.

Market leading end-to-end cloud solutions

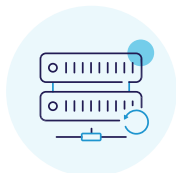

Cloud Compute

AUCloud Compute enables you to provision computing resources on demand.

Cloud Storage

AUCloud Storage provides a secure and highly adaptable storage platform to support a wide variety of uses.

Cloud Backup

AUCloud provides cost-effective immutable backup and ransomware protection for your operational data.

M365 Backup

AUCloud eliminates the risk of losing your Office 365 data enabling a smooth restoration of Exchange Online, Sharepoint OneDrive and Teams data.

Disaster Recovery

AUCloud allows you to simulate a Disaster Recovery (DR) failover to ensure all required virtual machines are protected and environmental settings are correct.

Security Operations Centre (SOC) Service

AUCloud Managed SOC provides confidence that your workloads are continuously monitored for cyber threats, and your data protected using rapid response capability.

Discover the latest in comprehensive cloud technology and services today.
