

Law firms are an attractive target for cyber criminals, due to the confidential nature of their clients' information and the volume of funds passing through trust accounts at any given time. Law firms are in a position of 'trusted advisor' to their clients, and there is enormous risk of severe consequences and reputational damage if a firm experiences a cyber security event.

Cyber security breaches occur every hour, every day – in fact, every 7 minutes. It is a vital area of information technology for law firms, and requires best-in-class innovative solutions. Cyber attacks are not a matter of 'if,' they are a matter of 'when.'

LexVeritas is proud to partner with AUCloud to deliver the LexCloud solution to the legal market.

LexCloud, powered by AUCloud, is the Superior Choice for Law Firms.

- ✓ **Data securely stored locally.**
All data securely stored and managed within Australian controlled and located data centres with sovereign ownership limiting application of foreign legislation and extra jurisdictional access.
- ✓ **Built to Government specifications**
Our solutions are developed in conjunction with, and for, Government and Critical Industry sector organisations to operate to the highest level of security. We meet, in fact exceed, the Australian Signals Directorate ISM control requirements.
- ✓ **Superior sovereign security assurance**
We are owned by Australians and managed and operated in Australia by security cleared Australians. All our services and the data we manage remains in Australia –ALWAYS. This includes customer data, metadata, monitoring and derived analytics data. Our Community Rules Information Security Policy (CRISP) guarantees higher security of everyone's data and distinguishes our service in the market.
- ✓ **Enhanced operational effectiveness.**
We integrate world leading API based IaaS automation, orchestration and monitoring practices that make it quicker, easier and more secure to transition at scale to cloud. Our advanced engineering enables improved service levels and proactive automated alerting.

The Benefits of LexCloud

LexCloud is available in a single or dual solution.

1. LexCloud Resilience

Cybersecurity Solution

Access to our security operations centre

- Continuous protective monitoring
- Incident detection and response
